

BEA-MUNCH

Parts Washer Solution

Parts Cleaning solution without the environmental, safety, and potential fire hazards of solvents -AT A FRACTION OF THE COST!

- * A revolutionary, environmentally-safe and highly effective Microbe-Powered concentrated formula to be used for cleaning in parts washers.
- * Remediates oil and grease into carbon dioxide and water.
- * Rinses clean and will not leave a film.
- * Dual rust inhibitors with superior corrosion protection across a broad range of substrates.
- * It outperforms caustic, solvent or acid cleaners on even the most tenacious soils.
- * This chemistry was developed in response to the increasing need for truly environmentally-safe cleaners to replace CFCs and chlorinated solvents.
- * Safe for all employees and the environment.
- * Biodegradable, non-toxic, non-caustic, non-flammable and non-hazardous.
- * Works with spray, immersion and ultrasonic cleaning applications.

APPLICATIONS

Cutting Fluids	Heavy Oils
Light Oils	Mold Release
Carbon Deposits	Waxes
Coolants	Greases
Fuels	Solvents

SPECIFICATIONS

Color:	Green/White
Form:	Powder
Flash Point:	None
Odor:	None
pH:	7

DIRECTIONS

Add 1 scoop (provided) for every 5 gallons of water. For best results, heat the solution to 125° F. and agitate for heavy, stubborn hydrocarbon build-up. Replace when the solution becomes cloudy (typically every 30 to 45 days). Soak and agitate the parts, tools or "product" as needed. Allow the parts to air dry or use an air hose for faster drying. Bea-Munch Parts Cleaner will clean and remove the oil, grease and oily film without any residue.
